Summary

With a working experience of more than 2 years and a passion for more than 10 years, I had seen how web had transformed itself from being a simple personal page to dynamic pages. Taking the passion to be the chosen career path, I then studied Computer Science in the Philippines and started working in Hong Kong afterwards. With just 2 few years of experience, I was promoted to Senior Web Developer where I had the main duty of creating websites from the project estimation phase to system designs to project deployment.

Creating and maintaining the Flash framework, Web-Based Admin Interface which includes Tracking Interface and Backend QA Interface are among my greatest technical achievements. Mentoring and passing along knowledge to my collage are my way of becoming a leader to my subordinate.

Skills

Flash Actionscript, Javascript, HTML, CSS, PHP, Java, Android Mobile, Shell scripts with bash and expect, MySQL, Firefox Extension, XUL

Experience

Senior Frontend Web Programmmer at Red Flag Group

, 10-50 employees
